Elle 'n' Elle Gym Centre
Product Requirements Document (PRD)

Professional Responsive Gym Website

Location: Akobo, Ibadan, Oyo State, Nigeria

This document defines the product goals, website sections, functionality, design direction, technical requirements, MVP scope and future roadmap.

1. Product Overview

The website will provide Elle 'n' Elle Gym Centre with a modern, responsive and professional online presence. Its main purpose is to showcase the gym, explain its services, build trust and make it easy for visitors to enquire or become members.

2. Product Goals

- Increase online visibility and brand awareness.
- Convert visitors into enquiries, trial visits and potential members.
- Showcase services, programs, facilities and approved gym photography.
- Provide clear contact and location information.
- Build trust through professional design, genuine testimonials and accurate information.
- Create a foundation for future online membership and management features.

3. Target Users

- New customers searching for a gym or fitness centre in Akobo/Ibadan.
- Existing members looking for schedules, updates or contact information.
- Fitness enthusiasts comparing gyms and training options.
- Potential clients interested in personal or group training.

4. Core Website Sections

Section	Purpose
Navbar	Branding, navigation and clear CTA.
Hero	Strong headline, gym image, value proposition and CTA buttons.
About	Introduce the gym and its mission.
Services	Present available fitness and training services.
Why Choose Us	Highlight verified benefits and facilities.
Membership	Present plans or an enquiry/join pathway.
Gallery	Show approved real photos of the gym.
Trainers	Introduce trainers when information is approved.
Schedule	Display classes or schedules where applicable.
Testimonials	Display genuine customer feedback with permission.
FAQ	Answer common customer questions.
Location	Address, map and directions.
Contact	Form and approved contact channels.
Footer	Navigation, contact details and copyright.

5. Functional Requirements

- Responsive layout for mobile, tablet and desktop.
- Mobile navigation menu that opens and closes correctly.
- Navigation links that scroll to the correct sections.
- Contact form validation with helpful error messages.
- Success message after valid form submission.
- Gallery lightbox/modal for enlarged images.
- FAQ accordion with expand/collapse interaction.
- Clear CTA buttons such as Contact Us, Join Now and Get Directions.
- Subtle animations that do not hurt usability or performance.
- All published business information must be verified before launch.

6. Design Requirements

- Modern, premium, energetic and professional visual style.
- Dark/neutral foundation with a strong contrasting accent.
- Large, high-quality real gym photography.
- Readable typography and strong section headings.
- Consistent cards, spacing, buttons and icons.
- Good colour contrast and accessible text sizes.
- Smooth but restrained hover and scroll animations.
- Clean layouts that avoid unnecessary clutter.

7. Recommended Homepage Flow

Navbar → Hero → About → Services → Why Choose Us → Gallery → Membership → Trainers → Schedule → Testimonials → FAQ → Location → Contact → Footer

8. JavaScript Features

- Mobile menu toggle.
- Smooth scrolling.
- Contact form validation.
- Gallery lightbox.
- FAQ accordion.
- CTA and membership interactions.
- Scroll reveal animations.
- Back-to-top button.
- Optional statistics counters.
- Optional testimonial slider.
- Optional light/dark theme switch.

9. Technical Requirements

- **Initial frontend:** HTML5, CSS3 and JavaScript.
- **Optional upgrade:** React and Tailwind CSS.
- **Future backend:** Node.js/Express or another suitable backend.
- **Future database:** MongoDB, PostgreSQL or another suitable database.
- **Deployment:** Reliable hosting with HTTPS.
- **Maps:** Embedded map or directions link.
- **Forms:** Frontend validation initially; backend/email service later.

10. Suggested Project Structure

elle-n-elle-gym/
■■■ index.html
■■■ css/
■ ■■■ style.css
■■■ js/
■ ■■■ script.js
■■■ images/
■ ■■■ hero.jpg
■ ■■■ gym-1.jpg
■ ■■■ gym-2.jpg
■ ■■■ ...
■■■ README.md

11. Content & Media Requirements

- Use the real gym images supplied by the client where appropriate.
- Optimise images for web performance.
- Use real trainer names/photos only after approval.
- Use genuine testimonials rather than invented reviews.
- Verify phone number, address, opening hours, prices and schedules.
- Add descriptive alt text to meaningful images.

12. SEO & Performance

- Add a descriptive page title and meta description.
- Use semantic HTML and logical heading structure.
- Optimise image sizes and formats.
- Use relevant local keywords naturally.
- Ensure good performance on slower mobile connections.
- Test accessibility and browser compatibility.

13. MVP Scope

- Responsive Navbar

- Hero
- About
- Services
- Why Choose Us
- Gallery
- Membership/Enquiry
- FAQ
- Contact Form
- Location
- Footer
- Responsive JavaScript interactions

14. Future Features

- Online membership registration.
- Online payment integration.
- Member login and dashboard.
- Admin dashboard.
- Membership, class and timetable management.
- Trainer management.
- Gallery/testimonial management.
- Contact/enquiry management.
- Announcements and notifications.
- Analytics dashboard.
- Backend API and database.

15. Acceptance Criteria

- Works correctly on mobile, tablet and desktop.
- All navigation links and buttons work.
- Forms validate correctly and show useful errors.
- Gallery and FAQ interactions work.
- Business information is accurate and approved.
- Images load correctly and are reasonably optimised.
- No major console errors remain before deployment.

16. Launch Checklist

- Confirm business name and branding.
- Confirm phone, email and location.

• Confirm opening hours.

• Confirm services and membership prices.

• Replace all placeholder content.

• Add and optimise approved images.

• Test contact form and all CTAs.

• Test mobile responsiveness and major browsers.

• Check SEO and accessibility basics.

• Deploy using HTTPS.
