ELLE 'N' ELLE GYM CENTRE

UPDATED PRODUCT REQUIREMENTS DOCUMENT

Location: Akobo, Ibadan, Oyo State, Nigeria

1. Project Overview

• The website will provide a professional digital presence for Elle 'n' Elle Gym Centre.
• It will explain services and membership plans, display images, support booking requests,
• provide contact information, and prepare the platform for secure online payments.

2. Main Website Pages

• Home; Services and Membership; Booking; Contact.
• Responsive navigation and a standard footer must appear across the website.

3. Home Page Improvements

• Hero slideshow automatically changes images every 7 seconds with a smooth fade effect.
• Include detailed introduction, Why Choose Us, About and image gallery sections.
• Include mission, community, values, instructor profiles, feedback/testimonials, FAQ,
• and clear call-to-action buttons for booking and contacting the gym.

4. Services and Membership

• Combine services and membership information on one page.
• Show Strength Training, Personal Training, Group Workouts, and membership plans.
• Display Daily, Weekly, Monthly, Family Package, and Personal Training options.
• All prices must be confirmed by the gym before launch.

5. Booking Requirements

• Collect full name, email, phone, selected service, preferred date, preferred time,
• and optional message. Prevent past dates and validate required fields.
• Display a price summary and confirmation message after submission.
• Prepare integration with Paystack or Flutterwave. Payment must be verified on a secure backend.
• Secret payment keys must never be placed in frontend code.

6. Contact Requirements

• Display confirmed location, phone number, email address, and opening hours.
• Include a clickable Google Maps link and a contact/feedback form.
• Show a confirmation message after a message is submitted.

7. Design and Branding

• Use the official gym logo in the navigation bar, footer, and browser favicon.
• Use readable typography, consistent spacing, clear alignment, professional cards,
• appropriate image overlays, and responsive layouts for mobile, tablet, and desktop.

8. Technical Requirements

• Use React, Vite, React Router, and Tailwind CSS or the existing project styling system.
• Use reusable Navbar and Footer components.
• Store images in public/images and provide meaningful alt text.
• Ensure the website works without console errors and supports keyboard-friendly controls.

9. Acceptance Criteria

• All routes and navigation links work.
• Mobile menu opens and closes correctly.
• Slideshow changes every 7 seconds with fade animation.
• Home includes About, instructors, feedback, FAQ, and booking CTA sections.
• Booking validates fields and includes date, time, price summary, and confirmation.
• Contact includes a clickable map link.
• Logo and favicon display correctly.
• Website is usable on mobile, tablet, and desktop.

10. Future Enhancements

• Connect booking to a database, email/SMS notifications, and an admin dashboard.
• Add real-time availability, membership login, receipts, analytics, SEO,
• privacy policy, terms of service, and complete payment verification.

11. Important Notes

• The current booking form is a frontend prototype until a backend is connected.
• Real gym prices, address, phone, email, opening hours, instructors, and testimonials
• must be confirmed before launch. The logo filename must match the actual file in public/images.
