# ELLE ’N’ ELLE GYM CENTRE

Product Requirements Document

A modern, responsive gym website for membership discovery, bookings, service information, and customer engagement.

| | |
|---|---|
| **Business Location** | Akobo, Ibadan, Oyo State, Nigeria |
| **Project Type** | Responsive React and Tailwind CSS website |
| **Document Version** | Version 1.0 |
| **Primary Audience** | Prospective members, existing members, families, and personal-training clients |

Prepared for the development and implementation of the official Elle ’n’ Elle Gym Centre website.

# 1. Executive Summary

The Elle 'n' Elle Gym Centre website will provide a professional online presence that clearly communicates the gym's services, membership plans, facilities, location, and booking process. The website will be visually engaging, easy to navigate, mobile-friendly, and suitable for future expansion.

The updated scope combines the Services and Membership content into one detailed page, adds a stronger About section to the Home page, introduces a professional booking experience, provides a clickable Google Maps location, includes gym images, and maintains consistent navigation and footer components across all pages.

# 2. Project Goals

| Goal | Description |
|---|---|
| Build trust | Present the gym as a professional, welcoming, and community-focused fitness centre. |
| Increase enquiries | Make it easy for visitors to contact the gym or request a visit. |
| Increase bookings | Provide a clear and simple booking form for memberships, training, and gym visits. |
| Explain services | Give visitors detailed information about workouts, training options, and packages. |
| Improve accessibility | Ensure the website works effectively on mobile phones, tablets, and desktop computers. |
| Support growth | Create a flexible structure for future payments, member accounts, and booking management. |

# 3. Target Users

• Students and young adults seeking an affordable gym.

• Working professionals who need flexible membership options.

• Families interested in a family package.

• Beginners who need guidance and a welcoming environment.

• Existing members who need contact or booking information.

• Clients interested in personal training.

# 4. Brand and Visual Direction

The website should communicate energy, confidence, discipline, community, and professionalism.

| Element | Requirement |
|---|---|
| Primary colour | Deep navy blue for trust, headings, and major navigation areas. |
| Secondary colour | Teal for links, action highlights, and selected interface elements. |
| Accent colour | Gold/yellow for calls to action, highlights, badges, and pricing accents. |
| Backgrounds | White and light blue-gray backgrounds for readability. |

| Element | Requirement |
|---|---|
| Typography | Bold, clear headings with highly readable body text. |
| Imagery | High-quality gym, training, team, and community images. |
| Design style | Modern, spacious, responsive, card-based, and conversion-focused. |

# 5. Website Structure

| Page | Purpose |
|---|---|
| Home | Introduce the gym, explain the value proposition, show key services, present the About section, and direct users to book or join. |
| Services & Membership | Combine all gym services and membership plans into one detailed page. |
| Booking | Allow visitors to submit a professional booking or visit request. |
| Contact | Provide contact details, opening hours, a message form, and a clickable Google Maps location. |

# 6. Functional Requirements

## 6.1 Global Navigation

• Display the gym logo.

• Provide links to Home, Services & Membership, Booking, and Contact.

• Include a prominent Join Now or Book a Visit button.

• Provide a responsive mobile hamburger menu.

• Close the mobile menu after a link is selected.

## 6.2 Home Page

• Hero section with headline, description, gym imagery, and booking action.

• Why Choose Us section.

• Preview cards for strength training, personal training, and group workouts.

• Detailed About section explaining mission, values, and community focus.

• Display approved gym images in a responsive layout.

• Final call-to-action linking to Booking.

## 6.3 Services & Membership Page

• Combine services and membership information.

• Describe each service and its benefits.

• Display membership plans in clear pricing cards.

• Include Daily, Weekly, Monthly, Family Package, and Personal Training options.

• Add booking buttons to relevant plans and services.

## 6.4 Booking Page

• Professional two-column desktop layout and single-column mobile layout.

• Fields for name, email, phone, service, preferred date, and message.

• Required-field validation.

• Confirmation message after successful submission.

• Prepare for future email, WhatsApp, database, or booking-system integration.

### 6.5 Contact Page

• Display location, hours, phone number, and email.

• Make the location clickable and open Google Maps.

• Provide a contact message form.

• Show a success message after valid submission.

• Use real gym details before publishing.

### 6.6 Footer

• Display logo and short description.

• Include quick links.

• Include location, phone, email, and opening hours.

• Include Book a Visit button.

• Display a dynamic copyright year.

## 7. Membership and Pricing Content

| Plan or Service | Price | Website Presentation |
|---|---|---|
| Daily Membership | ■3,500 | Flexible short-term access. |
| Weekly Membership | ■17,000 | Useful for short stays or busy schedules. |
| Monthly Membership | ■30,000 | Standard membership option. |
| Family Package | ■30,000 | Family or multiple-member package, subject to confirmation. |
| Personal Training | ■5,000 | One-on-one training and structured guidance. |

**Important: Prices and package details must be verified by the gym owner before launch.**

## 8. Technical Requirements

| Area | Requirement |
|---|---|
| Frontend | React with Vite. |
| Styling | Tailwind CSS with responsive utility classes. |
| Routing | React Router for page navigation. |
| Components | Reusable Navbar, Footer, service cards, membership cards, form fields, and buttons. |

| Area | Requirement |
|---|---|
| State management | React useState for menus, forms, validation, and confirmation states. |
| Images | Approved images stored in public/images with accessible alt text. |
| Forms | Client-side validation first; backend integration later. |
| Maps | Clickable Google Maps URL for the gym location. |
| Compatibility | Current Chrome, Edge, Firefox, and Safari browsers. |

## 9. Non-Functional Requirements

• **Responsive design:** Work on mobile, tablet, and desktop.

• **Performance:** Optimize images and page loading.

• **Accessibility:** Use clear labels, readable text, keyboard-friendly controls, and sufficient contrast.

• **Maintainability:** Organize components clearly and avoid duplication.

• **Security:** Protect form data when a backend is connected.

• **Usability:** Visitors should reach Booking or Contact within one or two clicks.

• **Consistency:** Follow one color, spacing, button, heading, and card system.

## 10. User Journey

| Step | User Action | Expected Result |
|---|---|---|
| 1 | Visitor opens Home. | Visitor understands the gym’s offer. |
| 2 | Visitor views About and services. | Visitor gains confidence in the gym. |
| 3 | Visitor opens Services & Membership. | Visitor compares services and prices. |
| 4 | Visitor selects Book Now or Join Now. | Visitor reaches Booking. |
| 5 | Visitor completes the form. | Website validates the information. |
| 6 | Visitor receives confirmation. | Visitor knows the request was submitted. |
| 7 | Visitor needs more information. | Visitor uses Contact and Google Maps. |

## 11. Acceptance Criteria

• Logo displays correctly on desktop and mobile.

• All navigation links work without blank pages or routing errors.

• Mobile menu opens, closes, and navigates correctly.

• Home contains hero, benefits, service preview, About section, images, and booking call-to-action.

• Services and Membership appear together on one page.

• Booking contains required fields and a confirmation state.

• Contact includes a working clickable Google Maps link.

• Footer appears on every page.

• Placeholder details are replaced or approved before launch.

• Website is tested on mobile, tablet, and desktop.

## 12. Future Enhancements

• Online payment integration.

• WhatsApp booking and enquiries.

• Admin dashboard for bookings and messages.

• Member login and membership renewal.

• Automated email or SMS confirmations.

• Testimonials and success stories.

• Class timetable and trainer profiles.

• Fitness blog or education section.

• Analytics and search-engine optimization.

## 13. Project Deliverables

| Deliverable | Description |
|---|---|
| Responsive website | Complete React website with all approved pages. |
| Reusable components | Navbar, Footer, buttons, cards, forms, and layout components. |
| Styled pages | Home, Services & Membership, Booking, and Contact. |
| Image integration | Logo and approved gym images placed in public/images. |
| Form validation | Client-side validation and confirmation states. |
| Documentation | Setup instructions and project usage notes. |
| Testing checklist | Verification of navigation, responsiveness, forms, images, and links. |

## 14. Final Notes

Before the website is published, the gym owner should confirm the official logo, exact business name, phone number, email address, opening hours, membership prices, approved images, and exact Google Maps listing. After confirmation, the website can be tested and prepared for deployment.
